Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 and claims 2-11 dependent therefrom are narrative because of the presence of language such as "at the beginning of opening the outer door". The terms "beginning" and "thereafter" suggest timing of events as opposed to structure that performs the functions recited by the claims at issue.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morrison P.N. 3,661,389 in view of Arai P.N. 6,145,828.

Art Unit: 2859

Morrison discloses a document handling apparatus having a sheet feed device.

Applicant's attention is directed to Fig. 2 and corresponding description. An inner door or deck 75, has mounted therein a feed roller 101 that is urged against its pair 102 mounted on the inner body of the apparatus. Also provided is a cover or outer door 14. Both doors are rotatably secured to the apparatus main body.

The only difference between the prior art as represented by Morrison and the claims at issue is the operational relationship claimed between the two doors. That is Morrison is silent as to how the two doors move with respect to each other.

6. To link the doors operation however in an apparatus such as Morrison's, would have been obvious to the artisan of ordinary skill in the art in view of Arai. Arai teaches in a very similar arrangement of doors a linkage 34. To provide such linkage in the Morrison apparatus would have been found advantageous to the artisan of ordinary skill in the art in view of the "single handed " operation for clearing jams as described by Arai.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yoshida, Yamamoto and Ahn et al. all disclose sheet feeding devices. Note the abstract and drawings of each of their disclosures.
